PETITION TO SAVE THE GREATER BLUE MOUNTAINS WORLD HERITAGE AREA AND ITS WILD RIVERS FROM THE RAISING OF WARRAGAMBA DAM WALL

To the Honourable the Speaker and Members of the Legislative Assembly of New South Wales in Parliament assembled.

The petition of Blue Mountains residents and other concerned citizens of NSW brings to the attention of the House NSW Government plans to inundate 65 kilometres of pristine wild rivers and 4,700 hectares of National Parks, including 1,000 hectares of the Greater Blue Mountains World Heritage Area, by the raising of Warragamba Dam wall. The NSW Government's stated reason for the destruction of the natural and cultural heritage of the southern Blue Mountains is to justify flood mitigation for new urban sprawl across 2,355 hectares of western Sydney floodplains.

The undersigned petitioners therefore request the Legislative Assembly take all reasonable steps to reject this environmentally destructive dam proposal and support the protection of the Greater Blue Mountains World Heritage Area and its associated wild rivers.
