### LIVING SMART UNION WORKSHOP

What can your Union do to support you in living more sustainably at home and at work?

What role do you want us to play in addressing climate change?

Over the past year we have run a range of very popular, very successful Living Smart Union courses. Now, we want your feedback to help us take this ground-breaking program to the next level.

The outcomes of this workshop will guide the implementation of our Climate Change Policy, and will include a brief report on the Living Smart Union outcomes to date and other actions already undertaken by the Union.
