

RiverWise Congregations

Become a *RiverWise Congregation* today and be a congregation that cares about creation!

Participating congregations will:

- Work with an Anne Arundel Master Watershed Steward (AAMWS) and Interfaith Partners for the Chesapeake (IPC) to educate and engage your congregation in creation care. More information about these organizations can be found at www.aawsa.org and www.interfaithchesapeake.org.
- How much polluted runoff does your congregation generate? Receive a free assessment to find out, and learn about potential projects to reduce your pollution.
- Under the guidance of your AAMWS, each congregation makes their own decisions about which projects to implement.
- Receive professionally designed and installed improvements to reduce polluted runoff including...
 - Rain Gardens
 - Pervious Hardscapes
 - Conservation Landscapes with Native Plants

Congregations will be asked to underwrite a nominal portion of the project costs and agree to maintenance. Installations will be made in the Fall of 2014 and Spring of 2015.

Interested congregations, please contact us by *January 10th*!

***"God makes the rain,
we make the pollution."***
