

It's Our Right To Know

A 2012 Ballot Initiative Campaign

Since the 1990s, we have repeatedly asked the FDA, the USDA, our legislators and the courts to label food that contain genetically modified organisms. They haven't.

**It's time for Californians
to vote on labeling
genetically engineered foods.**

Our grassroots movement for an initiative for the 2012 ballot to require mandatory labeling of GMO foods has taken off.

Care about the future of your family's food?
We need YOU to join us to make informed consumer choice the law!
