L.A. GOP Chairman Reacts to (Another) Democrat Scandal

BURBANK, April 2, 2014 – This latest dirty trick from the Democrats in Long Beach is only the latest example of a political reality is coming into clear view: something is very wrong in the Democrats' California culture of corruption. By any objective measure, this fraudulent Democrat slate card was meant to do one thing and one thing only: Deceive Republican voters.

It is very revealing that Democrats are so insecure about their current political situation that they would resort to this kind of outright deception.

“I call upon the Democrats statewide, their union funders and local party leaders to condemn this practice, determine how it happened, and reveal this truth to the public at once.”
