

# Save St Helier Hospital's A&E department and maternity unit

I/we, the undersigned, call on the South London CCGs to listen to local residents' concerns about the flawed Better Services Better Value review and keep open St Helier Hospital's A&E department, Maternity and Children's ward and develop a plan which has local support, is based on solid evidence and provides the desperately needed services in the community without which there can be no credible reform of hospital services
