

March Against

#MarchAgainstMonsanto

Why do we march?

- Research shows Monsanto's genetically-modified (GM) foods can lead to serious health conditions such as the development of cancer tumors, infertility and birth defects.
- The FDA is steered by ex-Monsanto executives and we feel that's a questionable conflict of interests explaining the lack of government-led research on the long-term effects of GM products.
- Recently, the U.S. Congress passed the nicknamed "Monsanto Protection Act" that, among other things, bans courts from halting the sale of Monsanto's genetically-modified seeds.
- For too long, Monsanto has been the benefactor of corporate subsidies and political favoritism and continues to forge its monopoly over the world's food supply, including exclusive patenting rights over seeds and genetic makeup.
- Monsanto's GM seeds are harmful to the environment; for example, scientists have indicated they have contributed to Colony Collapse Disorder among the world's bee population.

When do we march?

May 25, 2013 Worldwide

Michigan locations (click for details or visit [facebook/MarchAgainstMonsanto](https://www.facebook.com/MarchAgainstMonsanto))

Ann Arbor, MI

Jackson, MI

Mt. Pleasant, MI

Detroit, MI

Kalamazoo, MI

Sault Ste. Marie, MI

Flint, MI

Lansing, MI

Sterling Heights, MI

Grand Rapids, MI

Marquette, MI

Traverse City, MI

What are solutions we advocate?

- Voting with your dollar buy organic and boycotting companies that use GMOs in their products.
- Labeling of GMOs so that consumers can make those informed decisions easier.
- Repealing relevant provisions of the US's "Monsanto Protection Act."
- Calling for further scientific research on the health effects of GMOs.
- Continuing to inform the public about Monsanto's secrets.
- Taking to the streets to show the world and Monsanto that we won't take these injustices quietly.

We will not stand for cronyism. We will not stand for poison. That's why we March Against Monsanto.
