

TOO HOT TO TROT

Imagine working 9 hours a day on hard, hot pavement while inhaling exhaust in dangerous city traffic; only to return at night to cramped, filthy and rundown stalls more like prison cells than stables. Certainly not what we'd call "a walk in the park".

That's why NYCLASS is working to phase out horse-drawn carriages in NYC and replace them with fully electric, vintage-replica vehicles as a humane and emission-free alternative. **You can help!**

Visit www.StopHorseAbuse.com to sign our petition in support of Intro. 86 — legislation that would make our eco-friendly alternative a reality and retire the carriage horses to sanctuaries.
