5. In ‘Box L’ Australian Conservatives

REMEmber: You must number at least 6 boxes above the line

“WE’VE GOT THE GUTS TO SAY WHAT YOU’RE THINKING”

PLEASE RETURN FOR REUSE

Authorised by Michael Pucci for Pauline Hanson’s One Nation 2/38 Hudson Rd Albion QLD 4010
Let’s Bring Back Australian Values
Learn more at: www.onenation.org.au

Affordable Energy and Cost of Living
One Nation will implement low cost, reliable, dispatchable power by building new low-emission coal and gas power stations. We will restore Australia’s essential 90-day fuel security policy and commit to reducing cost of living expenses, while ensuring manufacturers have a globally competitive power source.

Farming and Water
We will fight to compensate farmers financially for loss of property rights due to UN agreements. Farmers and water are what make this nation great, but we see our politicians ignoring our farmers in times of drought. We must build more dams and create water security across Australia. We oppose the privatisation of water and any mining or CSG exploration on prime agricultural land where it will have an impact on our environment and water supply. One Nation will hold banks accountable for forced takeovers and land grabs.

Refugees and Asylum Seekers
Asylum seekers, in general, should make an application for asylum in the first safe country they reach. Travel beyond the first safe country is for economic reasons and should be subject to normal immigration controls and not entitled to a permanent visa under the Humanitarian program.

Citizens Initiated Referenda
Push for the introduction of Citizens Initiated Referenda (CIR), giving Australians the opportunity to have their say and bring about change without waiting for politicians to listen and act.

The Ice Epidemic
Build rehab facilities for addicted drug users to alleviate pressure on our hospital facilities. Treatment to be funded through the seizure of assets and money from the proceeds of drug crimes. Life sentences for large illicit drug manufacturers and drug kingpins. Empower parents, with a judge’s consent, the ability to institutionalise drug addicted children (regardless of age) for treatment.

Immigration
Advocate for a zero-net immigration intake where those who leave Australia are replaced with migrants who are culturally cohesive with Australians and will assimilate. Sustainable migration will allow the Government time to catch up on infrastructure and essential services to ensure Australia does not end up with third world standards.

Australian Jobs and Infrastructure
Jobs for Australians first and foremost. Investigate the abuse of foreign work visas. Introduce an apprenticeship scheme that will create jobs for Australians. Build infrastructure projects such as a national fast rail service, dams and water projects, hospitals and upgrade major roads.

Pensioners
We propose an increase to the basic couple pension of $150 per fortnight with a claw through to the single and disability support pension, the carer payment and service pensions. We oppose the family home as part of the asset test.

Family Law and Child Support
We believe that support must be given to both parents through a fairer family law and child support system. Many parents are denied access to their children, with many committing suicide. Children have a right to have both parents involved in their life if the parents are deemed to be fit and able.

United Nations and Trade Agreements
Review and revoke any Free Trade Agreements that are not in Australia’s best interest. We will not let the United Nations dictate to our politicians how to run our country. We will revitalise our own manufacturing and trade industries and leave the Trans-Pacific Partnership (TPP) if it proves to be detrimental to Australia. We uphold the Australian Constitution.

Radical Islam and Removing the Burqa
One Nation supports the removal of Islamic full-face coverings in all Government buildings. This is not an unreasonable requirement, especially given the sexist nature of the garments involved. Radicalised schools must be closed down and the offending students placed in juvenile detention. One Nation would introduce a Travel Ban on countries that are known sources of radical Islam coming into Australia.

Foreign Ownership
We oppose full foreign ownership of Australian land and assets. Foreign ownership of established housing must be investigated with illegally purchased properties seized. We must protect our farming industry from foreign ownership.

Taxation
We oppose any increase in the GST as it will reduce spending, hurt the poor and destroy small business. We support investigating and developing an alternative tax system and fair tax reform as well as ensuring the 700+ multinational companies operating in Australia pay their fair share of tax and cut our national debt.

Medicinal Cannabis
We will continue to fight for the use of whole plant medical cannabis for all Australians, so access can be obtained through your local GP and distributed by a local chemist under Schedule 4 of the TGA. Cannabis has been used for centuries as a natural medicinal agent and it’s time the Government start putting those who could benefit ahead of political ideology.

Firearms Ownership
We support responsible gun ownership and will uphold the current laws which allow law abiding citizens access to firearms, whether it be for work, farming or sports-related activities. We do not believe that further stringent measures or regulations are required regarding licensing. We call for stricter border security and tougher sentencing for gun related crimes and traffickers.

Rorting of Services
We will introduce an identity card for those Australians who are accessing taxpayer-funded services. Some foreigners, illegal immigrants and Australians are rorting our health and welfare systems because they cannot be positively identified. This is causing a drain on our taxpayer-funded services, leading to skyrocketing welfare and health budget blowouts.

Politicians and Their Perks
We will uncover the disgraceful entitlements given to politicians. We will continue to expose and reduce the number of bureaucrats who are paid more than politicians. Current pensions for former PM’s and politicians are unacceptable.
