We have the right to know!
Let's label GMOs in New York State!

Whereas the European Union and various other countries have either banned or require the labeling of genetically engineered foods due to the inevitable health hazards they may cause;

Whereas we have the right to know what we are eating;

Whereas the full extent of health effects of genetically engineered foods are not yet known nor have they been proven to be safe;

We the undersigned call on local, state, and federal lawmakers to require the labeling of genetically engineered foods.
