

# To the Legislative Assembly of Victoria

This Petition of residents from Western Victoria draws to the attention of the House the need to make cancer compensation accessible to both career and volunteer firefighters.

The State Government promised Victorian firefighters cancer legislation for 2016, but volunteers are concerned that there now appears to be new restriction that limits their access to the legislation.

The Andrews Labor Government must deliver legislation that does not discriminate against the men and women in our volunteer brigades who protect our communities.

The petitioners therefore request that the Legislative Assembly of Victoria ensures that the Andrews Government acknowledges all volunteers and career firefighter and ensure they are offered equal protection for protecting Victoria.
