

COALITION FOR CRITICAL INFRASTRUCTURE

★ CONNECTING TEXANS ★

More Jobs, Not Lawsuits

OUR PURPOSE

We are dedicated to maintaining Texas' strong business climate by addressing the growing need for the critical infrastructure improvements that enhance the lives of Texas residents and businesses.

OUR GOAL

To protect property rights and critical infrastructure projects without creating incentives for litigation, which ultimately shifts higher costs to Texas consumers and taxpayers.

TEXANS OVERWHELMINGLY SUPPORT CRITICAL INFRASTRUCTURE PROJECTS

A recent statewide survey conducted by Baselice and Associates shows that 73% of Texans support critical infrastructure projects, including roads and highways, power lines, Internet and phone networks, water supply pipelines, drainage and flood control and oil and natural gas pipelines.

OUR POSITION

We support legislation that clarifies and strengthens the eminent domain process without creating new incentives for litigation.

OUR SOLUTION: PROTECTING PROPERTY RIGHTS AND CRITICAL INFRASTRUCTURE

We are committed to working with the legislature and property owner groups to strike the right balance in protecting landowners and Texans who support critical infrastructure projects. We support clarifications to existing Texas law that assure fair and equitable compensation for landowners, provide certainty and finality in the eminent domain process, and strengthen long-term relationships between property owners and entities with critical infrastructure builders.
