## “Outsourcing health services means private companies make profit from patients...We have a right to decent, affordable public health.”

Campbell Newman and Lawrence Springborg are headed down the dangerous road of privatisation and they are starting with our valuable health and hospital services. They are selling out their responsibility to provide quality healthcare and handing it off to big companies whose first and major priority is to turn a profit.

It doesn't have to be this way. Already, tens of thousands of Queenslanders have shown that they are ready to stand up for local, quality services in their community, because our kids should have the best opportunities no matter where they live or where they come from.
