

1st Annual OSEA Community Power Conference: It's everybody's business now!

When: November 15th-16th, 2009

Where: Metro Toronto Convention Centre, Toronto, ON/CAN

The 1st Annual OSEA Community Power Conference 2009 (CP2009) will connect international organizations to a network with government officials, industry experts and Community Power professionals who are key players in the sustainable energy sector.

Join **Dr. David Suzuki**: award-winning scientist, environmentalist, broadcaster and Honourary Chair of the 1st Annual OSEA Community Power Conference at this landmark conference.

CP2009 will focus on driving forward the development and ownership of renewable energy projects in Ontario communities including farmers and landowners, cooperatives, First Nations and Métis communities, municipalities, utilities, and educational, civic and religious institutions.

If you are in the sustainable energy industry we want to hear from you to share best practices, success stories and knowledge from your years of experience with Community Power projects.

CP2009 will:

- Bring together the industry experts, government leaders and the pioneers of Community Power
- Provide valuable information about how to develop community-based sustainable energy projects
- Feature workshops and presentations outlining key innovation technologies, the strength of strategic partnerships and how to secure financing for projects.
- Build the needed networks to support Community Power
- Facilitate the formation of key relationships between community groups, municipalities, local distribution companies and private developers
- Outline how to make the FIT and MicroFIT programs work for community groups
