

Request for Presentation Abstracts

Community Wind Across America Northeast regional conference

Oct. 26-28, 2011

Desmond Hotel, Albany, NY

DEADLINE: AUGUST 3, 2011

Windustry's *Community Wind Across America* regional conferences cover **Community Wind** and **Small Wind** in a two-track program, with a mix of case studies and technical information, to provide the full range of what's needed to advance opportunities for locally-owned wind energy production.

Presentations for the **Northeastern Conference** should be geared toward anyone interested in benefiting from wind energy production - rural landowners, farmers, ranchers, municipal utilities, elected officials, town planners, tribal representatives, economic development professionals, business leaders, investors, bankers, and community leader.

These regional conferences have been made possible in part by a grant from the Department of Energy, to bring hundreds of stakeholders together to learn from each other and experts in the renewable energy field. Since 2010, Windustry has held conferences in the Colorado for the Rocky Mountain Region, Minnesota for the Midwest, and Pennsylvania for the Mid Atlantic, and Michigan for the Great Lakes.

- Permitting Perspectives
- Zoning Ordinances
- Incentives and Options for Financing
- Other

Description of presentation for selection purposes (200+ word)

Windustry® is a national non-profit with a mission to promote progressive renewable energy solutions and empowers communities to develop and own wind energy as an environmentally sustainable asset. Through member supported outreach, education and advocacy we work to remove the barriers to broad community ownership of wind energy.
