20's Plenty for Healthier Places conference

WEDNESDAY 8 MARCH 2017

**BANQUETING SUITE,
BIRMINGHAM CITY COUNCIL**

Experts on speed reduction will cover health-themed best practice, innovation, research, policy and cost effectiveness. Please save the date, list it in your listings and invite Councillors and Public Health Directors.

20's Plenty for Us ...making your place a better place to be

The National 20mph conference, now in its 8th year, will focus on why and how best to implement and educate drivers on 20mph limits to make a healthier public realm that feels safer, cleaner and friendlier for all. 20mph limits are proven for public health and are better for the environment by improving air quality. Limits without humps are very popular, do not significantly change journey times and boost the local economy by improving footfall.

DELEGATE RATES
