20's Plenty for Us

...making your place a better place to be

The 10th National 20mph conference aims to predict and imagine local travel behaviours in the 2020's. Major changes in the future mix of transport modes are predicted – from pressures on active travel, emissions, vehicle sharing and economic factors. Technologies like e-bikes, e-scooters, speed limiters, vehicle automation and speed enforcement will be featured. Overlaid are the Vision Zero goal for no road deaths or serious injuries and the climate emergency where transport emissions must urgently be tackled.
