The developer of the terminal promised no coal. Now he wants to bring in coal!

Phil Tagami: Keep Your Promise!

JOBS-NOT COAL!

Our jobs and health are threatened by the transport of coal through Oakland. Coal is a dangerous product from a failing industry - not the way to build Oakland’s economy.

JOIN US AT CITY HALL

Tuesday, December 8, 2015
Oakland City Council Meeting at 5:30 pm

Tell the City Council that we want good jobs, not jobs with the health and safety dangers of toxic coal. Tell the City Council we don’t want seven tons of coal dust every week polluting Oakland.

Big Coal is teaming up with a local developer to transport its toxic fuel through Oakland for export! This will endanger our health and safety!

Up to **9 million tons of coal** threatens to come through Oakland annually from Utah mines to be shipped from a new terminal at the former Oakland Army Base.

**Coal transport has serious local health and safety impacts as well as disastrous effects on the global climate.**

**One ton of coal dust every day** blowing from mile long trains coming into our communities would poison the air we breathe - causing asthma, cancer and heart disease. Such daily trains will add to the already serious noise and danger for commuters and residents. Burning coal contributes to global climate disruption more than any other fossil fuel - no matter where it’s burned.

**Tell the Oakland City Council to stop this toxic coal proposal.**

The Council can protect the health of communities, workers and the climate by acting now to stop coal exports. This terminal can export non-toxic goods such as wood, steel, agricultural products and oversize products like plane or tractor parts. Such shipping will bring much needed jobs, business, and benefits to Oakland without jeopardizing our health.

**We don’t need to export coal!**

**Join us on Tuesday, December 8 at City Hall**

Tell the City Council we want jobs with health and safety not the dangers of toxic coal threatening our communities!
