

Relationships that are warm, responsive and predictable help our children thrive. Relationships that generate intense stress can harm the developing brain.

## The First Relationships: Love Builds Brains

Please join Andrew Fleck Child Care Services for their annual community meeting and an evening with Dr. Jean Clinton

October 2, 2014

7:00 - 9:00 pm

**Sir Robert Borden High School**

131 Greenbank Road

Nepean, Ontario

With grateful support from:

Dr. Jean Clinton is an Associate Clinical Professor, Department of Psychiatry and Behavioural Neurosciences at McMaster, division of Child Psychiatry. She is renowned

internationally as an advocate for children's issues. Her special interest lies in brain development, and the crucial role relationships and connectedness play therein. She is an advocate for the importance of relationships, early child development, brain development, parenting and asset building. Jean champions the development of a national comprehensive child well-being strategy which includes a system of early learning and child care for all young children and their families.
