

Relationships that are warm, responsive and predictable help our children thrive. Relationships that generate intense stress can harm the developing brain.

The First Relationships: Love Builds Brains

Please join us:

October 3, 2014

Full day (lunch included)

This presentation explores the developing brain and the crucial role relationships with others play in healthy development

Confederation Educational Centre

1645 Woodroffe Avenue

Nepean, Ontario

Spaces are limited

This exciting workshop is being offered at no cost thanks to the following partners:

In the past decade and more the role of the environment, both physical and emotional has led to a deeper understanding of what young children need in the early years to thrive.

Dr. Jean Clinton is an Associate Clinical Professor, Department of Psychiatry and Behavioural Neurosciences at McMaster, division of Child Psychiatry. She is

renowned internationally as an advocate for children's issues.

Jean champions the development of a national comprehensive child well-being strategy which includes a system of early learning and child care for all young children and their families.
