

Attention Frontier Airline Passengers

Frontier is making record profits by charging all of its passengers fees.

- Fees for seat assignment
- Fees for checked and carry-on bags
- Fees for a drink or snack in flight

Yet, Frontier management is pocketing the fees.

- Frontier Airlines is one of the most profitable airlines in the nation.
- While the executives took bonuses of over 275 million dollars over the last two years, Frontier Flight Attendants have not had a wage increase since 2008.
- Frontier Flight Attendants are among the lowest paid of all major U.S. Carriers.
- Flight Attendants should not have to choose between paying their utilities and buying food.

Fees should not further enrich airline executives while Flight Attendants are kept impoverished.

AFA is not currently on strike or boycotting Frontier Airlines and we encourage passengers to continue to Fly Frontier airlines at this time.
