

# 154 REASONS

To have a Joint Health  
& Safety Committee

# 154 REASONS TO HAVE A JOINT HEALTH AND SAFETY COMMITTEE

**154 Albertans were killed because of work last year - deaths that could have been prevented.**

Alberta is the last province in Canada to make Joint Health and Safety Committees mandatory in workplaces. Joint Committees have been proven to reduce accidents, which means fewer workplace deaths.

Joint Committees bring employers and workers together to solve safety problems in the workplace. They are the best method for getting things done. Why hasn't Alberta signed on?

**Every workplace needs a Joint Committee. As a citizen of Alberta, I urge the government to pass legislation to make Joint Health and Safety Committees mandatory in all Alberta workplaces.**
