

NOC 7231 - Machinists and Machining and Tooling Inspectors - Prevailing Wage January 1, 2009 to March 31, 2014

000001

Prevailing Wages for selected NOC by region January 1, 2009 - March 31, 2014

Notes:

Wages for each requested NOC code are provided on an individual worksheet which includes the following fields:

PROVINCE	Province for which the wage was recorded
GEOGRAPHIC REGION NAME	Geographic region (provincial or sub-provincial) for which the wage was recorded.
PREVAILING WAGE	According to the methodology and source used, the prevailing wage may have been recorded as the mean, mode or median wage
REFERENCE PERIOD	Reference period as recorded in the database. May indicate the reference period for the data or the date the record was updated.
SOURCE	Where available, the source used is indicated.
DATE AVAILABLE	Where available, the date at which the wage was provided for use in adjudication.

General Notes:

1. In 2012 a new wage methodology and a new geography structure for collection and dissemination were adopted by ESDC. As a result, the prevailing wage information disseminated may not be comparable over time.
2. Wages are included in the list where a prevailing wage was disseminated by ESDC. Since May 2012, when no wage was disseminated for an occupation in a given geographic area, users were encouraged to consider wages for that occupation at a more aggregate level of geography (i.e. provincial wage, national wage).
3. Listed wages represent the general wage (representing all workers within an occupation independent of their work characteristics), except where a general wage was not entered and an alternate wage may have been displayed in its place. Alternate wages may include those for experienced workers, starting wages, or union wages among others.
4. Prior to May 2012, wages were not all updated upon a regular annual schedule. The date at which the prevailing wages were update was not disseminated. As a result, listed wages with no "Date available" may have been displayed at any time between January 2009 and May 2012.
5. Different wage information may have been used to adjudicate Labour Market Opinions by the Temporary Foreign Worker Program under specific initiatives or projects such as E-LMO.
6. Prior to May 2012, wages enclosed within this document may have been provided for reference purposes only and may not have been used to adjudicate Labour Market Opinions.
