**13.09.2019**

**To: ALDE Secretary-General  
Jacob Moroza-Rasmussen**

On behalf of the European Party of Ukraine (ALDE member), I have the honor to nominate myself as ALDE Vice President.

My name is Tatyana Terekhova. I am a journalist, a TV presenter, and a founder of the Ukrainian Educational “STUDWAY” platform. As a member of the European Party of Ukraine, together with other representatives of the journalist community of Ukraine, since 2011 I lead the journalist movement for freedom of speech, and against harassment and censorship defending the right to implement international journalism standards, and from this year I have been honored to become a Chairman of the European Party of Ukraine.

All these years of working and experiencing in the developing party structure and program, guided by the principles of liberalism, I have been training activists and members of the party regional branches to protect civil rights and defend freedom of speech, and most importantly, European values.

For more than 6 years Ukraine has been a member of the European party of Liberals and Democrats.

During this time all of our resolutions have been submitted by ALDE which we are very grateful for. It has been 2 years since now that we initiated the discussion about ALDE’s support in the development of liberalism in Non-European countries. We proposed ALDE to take attention and coordinate the processes which take place in Post-Soviet countries. By the experience of the last presidential elections in Ukraine, as our country showed a great example of a democratic society, we know how difficult to concur with freedom and democracy and how important it is to have support in this fight. We propose to elect one of the Vice presidents from the ALDE parties who are not members of the European Union. Liberalism needs energy and ALDE can provide it.

I am running for elections for liberalism, freedom, and democracy to become an essential part of human development, and not as luxury as it is right now. For me as for journalists with 12 years of experience, open media and freedom of speech are fundamental.

I do believe that together we can do great awareness-raising work for Post-Soviet countries to become European.
