# WHO WE ARE

The Alliance Party is the party of the future, driven and led by Americans who have an innovative eye on the future. We believe nobody should be left behind in an America that strives to be the best. To be the best, we have to excel in the areas that matter most to ALL Americans.

We must begin with a new breed of politicians: non-professional and term-limited politicians who serve the people rather than advancing a career by serving big money and special interests.

**Together, you and I are the future. We can own our future and make America better for all citizens, not just the ruling interests of the status quo.**

# THE FUTURE WE ENVISION

## Climate Change

We recognize the duty of the government to enact a comprehensive Green New Deal to reverse current trends and create 10 million new public and private industry green jobs.

## Healthcare

Universal access to quality and affordable healthcare for every American. A system in which half of personal bankruptcies are not caused by medical bills. Where you never have to choose between your health and basic living expenses..

## Income Inequality

A tax code that is simple and fair, where corporations and individuals are taxed equitably, the wages and purchasing power of workers are protected, and the government provides a secure social safety net for those in need.

## Education

A globally competitive education system with no barriers to a quality public education system that includes a free, national online university and eliminates predatory student loan financing.

## Political Reform

A representative democracy that expands access to our democratic processes, implements mandatory term limits, ends partisan gerrymandering, and eliminates corporate and dark money from campaign finance.
