Areas for improvement: New Hampshire is a bit of a mixed bag at the moment. It does well in the area of product safety, yet the regulations will not directly help patients until the state implements the dispensary system it approved well over two years ago. Making matters worse, the state has fought to keep patients from being able to obtain registry ID cards, thereby denying them legal protections if they are currently using cannabis for therapeutic purposes. The state should finish implementing its dispensary system, issue ID cards to patients with a recommending physician, and pass emergency home cultivation language to allow for access while the state finishes the dispensary implementation process.

Background: In 2013, New Hampshire became the 19th medical cannabis state when Gov. Maggie Hassan signed HB 573, Use of Cannabis for Therapeutic Purposes, into law after similar bills had been vetoed twice before. Patients and caregivers registered with the New Hampshire Department of Health's medical cannabis program, in possession of a registry ID card, and no more than two ounces of cannabis are protected from arrest or prosecution. If charged, registration provides an affirmative defense for patients or caregivers in compliance with the law. Patients and caregivers may not be denied any right or privilege on the basis of their status. Personal cultivation of cannabis is prohibited. Medicine must be obtained by the patient or registered caregiver from one of four "Alternative Treatment Centers" to be licensed by the state; up to two ounces may be purchased every ten days. A patient may designate only one caregiver, but a caregiver may assist up to five patients. Caregivers are limited to transporting medicine from licensed centers and assisting with administration. The state has issued licenses for Alternative Treatment Centers, however, the locations for each center have not been determined and the state does not plan to issue ID cards to patients until dispensary locations are finalized.

Tools for Success:

Improving your state law has never been easier. In the appendix of this report you will find model legislation and regulators guides for product safety protocols. ASA staff are all also available to draft and/or review legislative and regulatory language. Our website has many resources online including access to our policy shop at http://www.safeaccessnow.org/policy_shop, information for regulators available at <http://patientfocusedcertification.org/about/information-for-regulators/> and a breakdown of all the state laws at http://www.safeaccessnow.org/state_and_federal_law.
