Final Grade = F*

Areas for improvement: Wyoming quietly approved a limited CBD-focused bill to protect patients who obtain certain low-THC products from other jurisdictions. While this was a good first step, the law fails to address in-state production and access for patients, places arbitrary caps on THC, and fails to protect patients from civil discrimination in the areas of housing, employment, organ transplants, and child custody. In addition to fixing these problems, the state also needs to expand the number of eligible qualifying conditions and include product safety regulations.

Background: In 2015, Wyoming passed HB 32, which created a legal right for patients with intractable epilepsy to obtain registry ID cards and possess and use low-THC extracts. The law does not allow for the in-state production or dispensing of medical cannabis products. The Wyoming Department of Health has begun to issue patient ID cards.

Tools for Success:

Improving your state law has never been easier. In the appendix of this report you will find model legislation and regulators guides for product safety protocols. ASA staff are all also available to draft and/or review legislative and regulatory language. Our website has many resources online including access to our policy shop at http://www.safeaccessnow.org/policy_shop, information for regulators available at <http://patientfocusedcertification.org/about/information-for-regulators/> and a breakdown of all the state laws at http://www.safeaccessnow.org/state_and_federal_law.
