Imagine how internationally competitive our rail industry could be if State Governments followed Victoria's example and abandoned their ad-hoc approach to the purchase of Australia's future public transport and rail freight requirements.

Imagine the positive impact on Australia's record unemployment if the **\$13 billion** of your tax dollars was invested in our local jobs and industry.

BUILD OUR TRAINS HERE

Australia-wide, State Governments are in the process of buying

220 new trains,
17 new locomotives and
205 new freight cars

This amounts to a total of more than
\$10 billion in your tax dollars.

The Victorian Government recently committed to **50%** minimum local content, supporting Victorian rail jobs.

Every other Australian state government is spending their billions supporting the **Indian, Korean, Chinese** and **United States** rail industries, **not Australian rail jobs.**

Authorised by Paul Bastian, AMWU National Secretary.
Made in Australia by AMWU members.

“ Australian rail workers are skilled and competitive. We can take on the world’s best. But Governments need to give us a chance to compete. ”

VICTORIA LEADS THE WAY

The Andrews Labor Government has committed to **\$3.1 billion** investment in new trains and trams that will support Victorian jobs, Victorian apprentices, and Victorian manufacturing. This will support and create jobs in the state.

Let’s follow Victoria’s example!
