

MARGINAL SEAT POLLING

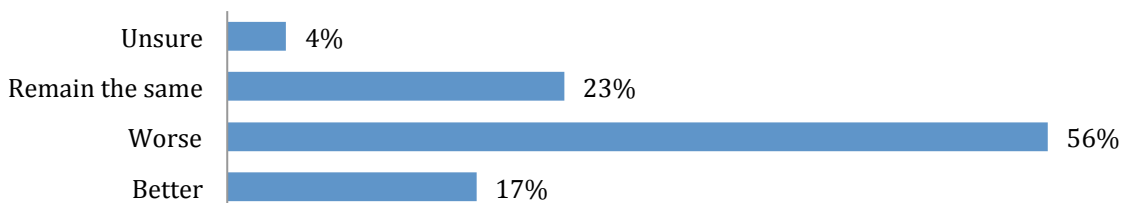

26 February 2016

The following data summarises the key findings of a WAOP poll of 600 voters conducted in two of the Barnett Government's most marginal metropolitan electorates, Joondalup and Forrestfield.

Compared to this time last year, are you currently feeling more or less financial pressure?

Over the next 12 months, do you think the outlook for jobs in Western Australia will get better, worse or remain the same?

Do you think the State Government has done enough to support local industry and jobs?

OTHER KEY FINDINGS:

- Only 42% of voters polled feel secure in their job.
- Only 17% of voters polled think that the State Government has a plan to create jobs in WA beyond the mining boom.
