Youth Smoking in New Zealand Pacific and Non-Pacific, Non-Māori (Boys and Girls)

Factsheet 6:

Youth Smoking in New Zealand Pacific and Non-Pacific, Non-Māori (Boys and Girls)

This factsheet describes daily, regular and never smoking for 14-15 year old Pacific boys and girls compared to non-Pacific, non-Māori boys and girls in New Zealand.

The ASH Year 10 Snapshot Survey has been used to monitor student smoking since 1999. This annual survey samples around half of the schools in New Zealand with Year 10 students. Results are reported for students who were 14 or 15 at the time of the survey. The results reported here are estimates for the whole population based on the Year 10 sample.

This is the largest survey of youth smoking in New Zealand and samples around half of all Year 10 students.

Up until 2010 the survey normally took place in term 3. Since 2011 the fieldwork has changed to term 2.

Methodology

To measure if they had ever tried smoking, students were asked: *Have you **ever** smoked a cigarette, even just a few puffs?* They can answer either 'yes' or 'no'.

To measure smoking frequency, students were asked: *How often do you smoke **now**?*

Options for response include: 'I have never smoked/ I am not a smoker now', 'At least once a day', 'At least once a week', 'At least once a month' or 'Less often than once a month'.

Regular smokers are those students who report that they smoke daily, weekly or monthly.

To classify ethnicity, students are asked: *Which ethnic group or groups do you belong to?*

Options for response include 'NZ European', 'Māori', 'Samoan', 'Cook Island Māori', 'Tongan', 'Niuean', 'Other Pacific Island', 'Chinese', 'Indian', 'Other Asian' and 'Other'. In this factsheet all ethnicities other than Pacific and Māori are classified as *non-Pacific non-Māori*.

Prioritised ethnicity is used to allocate students who identify with more than one ethnic group into a single category for analysis. Students who tick that they are joint Māori and Pacific ethnicity (e.g. Māori and Samoan) are classified as Māori.

The number of students identifying as Pacific who completed the survey in 2012 was 2,660 (9.4% of respondents) compared to 20,209 (71.1% of respondents) counted as non-Pacific, non-Māori.

Of those who identified as Pacific, there were 1,371 boys (49.5%) and 1,289 girls (48.5%).

Detailed methodology can be found in the *methodology* factsheet.

Key findings in 2012
