

This is The Climate Election

What do independent candidates and minor parties stand for?

Independents for Climate Action Now (ICAN)

Independent • multiple electorates • House of Representatives and Senate

Survey responses: **Phasing out burning coal**

Key test	Response	Comments
1. Provide a plan to rapidly phase out Australia's coal-fired power stations, starting with the dirtiest, most inefficient and polluting stations	Support	100% renewable energy transition by 2030 (page 5-6) No specific reference to which coal powered stations partially a state jurisdiction
2. Properly resourced plans and a comprehensive transition package for communities impacted by coal and gas closure – managed by a statutory authority, with regional hubs, and support for jobs in new, sustainable industries	Support	Managed Phase out of the fossil fuel industry (page 7) program for just transition of fossil fuel industry dependent communities and workers and (page 6) commitment to meet the skills needs of growing clean energy industry and support renewed manufacturing sector. No specific commitment to a statutory body for this role though do have a commitment to a Climate Emergency Planning

		Implementation Authority (page 4) which could perform this role
3. Putting Australia on a path to achieve zero net climate pollution well before 2050 and set targets for 2025 and 2030 to get us there	Support	National Climate Emergency Response Planning point 1 and 3 (page 4) Commitment is not 'well before' but not later than 2050. Believe this is realistic.
4. Commit to policies which will be: a. Effective at reducing climate pollution to meet pollution reduction targets, AND b. Easily scaled up to meet increasing targets	Support	100% renewable energy transition by 2030 (page 5) point 2 – effective market based price on Carbon Creating Beyond Zero Emissions Society (page 10) – all points
5. Ensure the largest source of climate pollution, the electricity sector, leads the way in cutting pollution.	Support	100% renewable energy transition by 2030 (page 5 - 6) all points It is the low hanging fruit of all the sectors but important other are addressed by effective policies as well
6. Not rely on international offsets to achieve Australia's climate pollution reduction	Support	No specific policy Support but question if this avoids opportunities for developed – developing world equity in terms of funding valuable conservation based off sets?
7. Provide climate finance to support the international community to cut pollution and adapt to a warming world – a minimum \$3.2 billion annually, in addition to existing aid obligations; and share Australian skills, expertise and resources	Support	National Climate Emergency Response Planning point 5a -d (page 4) No specific value in commitment

Survey responses: **Ramping up renewable energy**

Key test	Response	Comment
8. Set predictable, supportive, fair policies that remove barriers to clean energy and ensure clean energy powers 100% of Australia's electricity by 2030, and 100% of Australia's overall energy needs well before 2050	Partial Support	100% renewable energy transition by 2030 (page 5) all points Creating Beyond Zero Emissions Society (page 10) – all points

9. Make sure all Australians everywhere benefit from the transition to clean energy – including low-income households, renters, and remote Aboriginal communities	Support	No specific reference to identified demographics in policies but all Australian will benefit from transition.
10. Guarantee that both ARENA and CEFC are retained until 2030 with a continued focus on supporting renewable energy and energy efficiency, and restore the \$1 billion cut from ARENA's budget	Support	100% renewable energy transition (page 6) pt 9 No specific reference to \$1 billion cut but to increase and extend financial support.
11. Drive the establishment of a clean energy export industry to assist the clean energy transition in our region and grow a new clean export opportunity	Support	Managed Phase out of the fossil fuel industry (page 7) pt 4
12. Reform the National Electricity Market (NEM) with climate pollution reduction as a priority objective	Support	Not specifically articulated but result of policies would be including carbon price and 100% renewables by 2030
13. Stop fossil fuel subsidies, including the diesel fuel tax credit, and end tax breaks that incentivise environmental damage	Support	Managed Phase out of the fossil fuel industry (page 7) pt 3
14. Set vehicle emissions standards, to be fully phased in by 2025, that are at least as stringent as the US standards and align over time with the stronger EU standards while accelerating electric vehicle uptake	Support	Creating Beyond Zero Emissions Society (page 10) – pts 1 & 8 No specific reference to US or EU standards
15. Phase out uranium mining and export	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
16. Advance a new approach for the responsible and transparent management of Australia's radioactive waste	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
17. Stop new uranium sales and nuclear agreements	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
18. Advance the signing, ratification and implementation of the Treaty on the Prohibition of Nuclear Weapons	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may

Survey responses: **Stopping Adani's coal mine**

Key test	Response	Comments
19. Stop the Adani mine and keep all Galilee Basin coal in the ground on the basis that it poses an undue threat to the Great Barrier Reef, water, and endangered species	Support	Managed Phase out of the fossil fuel industry (page 7) pt 2

Survey responses: **Protecting nature**

Key test	Response	Comments
20. Introduce new laws which expand the oversight of the federal government to climate change, land clearing, critical habitats, water resources, air pollution and protected areas in the next term of government	Support	NRM and Ecosystem management for carbon sequestration pt 2 References to use of EPBC Act to restrict emissions Page 7. Not all values referenced but Matters of National Environmental significance (MNES) cited.
21. Establish and adequately resource an independent national environment protection authority that operates at arm's-length from government in the next term of government	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
22. Establish and adequately resource a national commission to develop enforceable national plans and standards and regional threat abatement plans	Support	National Climate Emergency Response Planning Pt 3 & 4 Planned Adaptation for Unavoidable Climate Impacts Pt 2
23. Ensure open standing, merits review and third-party enforcement rights under national environmental laws	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may

24. Establish a fund with a minimum annual investment of \$1 billion to protect and restore habitats, implement recovery actions, tackle invasive species and help our communities and wildlife adapt to climate change	Support	No specific budget commitment but quantum of commitment equivalent.
25. Ensure the protection of ten million hectares of high value ecosystems by 2021	Support	NRM and Ecosystem management for carbon sequestration pt2, 3,5,6,7,8,9 Planned Adaptation for Unavoidable Climate Impacts Pt 6, 7, 9
26. Ensure the ecological restoration of one million hectares of high value ecosystems by 2021	Support	NRM and Ecosystem management for carbon sequestration pt 3,5,6,7,8,9 Planned Adaptation for Unavoidable Climate Impacts Pt 6, 7, 9
27. Remove exemptions for native forest logging from national environment law and implement a national forest policy reform process	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
28. Restore the 2012 Commonwealth marine parks zoning supported by well-resourced enforcement, monitoring and community Engagement	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
29. Improve tax incentives for conservation and ecological restoration on private land	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
30. Improve mine rehabilitation rules and funding to make sure they lead to full mine rehabilitation	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
31. Ensure the tax system rewards the protection and regeneration of the environment and penalises its destruction	Support	No specific policy but indirectly support through carbon price and also intended mechanism in carbon farming incentives
32. Introduce a well-resourced system of annual national and regional environmental accounts and measures of prosperity	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
33. Expand the mandate of the Productivity Commission to explicitly consider environmental matters	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may

34. Introduce transparent and independent analysis of the social, economic and environmental costs and benefits of major projects through bodies such as Infrastructure Australia	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
35. Set Australia on a trajectory to halve our ecological footprint by 2030	Support	Not specifically articulated but would be an outcome if policies implemented
36. Restore funding of EDOs and conservation councils to 2010 levels	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
37. Deliver the commitments made under the Murray-Darling Basin Plan on time and in full, including the delivery of outcomes equivalent to 3,200 gigalitres in environmental water	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
38. Return responsibility for water to the environment portfolio and ensure an independent water compliance and enforcement unit is established in an EPA	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
39. Enable the full recovery of water in the Murray-Darling Basin through voluntary purchase on the open market	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
40. Adequately resource the Commonwealth Environmental Water Holder to build and deliver its critically important portfolio of environment water	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
41. Address constraints and barriers throughout the Basin to improve environmental outcomes and ensure water reaches natural floodplains	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
42. Revitalise national water reform in Australia and set out a roadmap for the recognition of Indigenous water rights?	No Policy	Have commitment to review of water allocation plans within context of new climate/rainfall reality While ICAN does not have a Party policy position on this issue individual candidates may

43. Establish a clear roadmap to deliver a Traditional Owner driven, consent based World Heritage nomination process for Cape York Peninsula	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
44. Commit to supporting the employment of 5,000 Indigenous rangers by 2025	Support	No specific budget commitment but would be an outcomes of expansion of National Reserve System for climate resilience
45. Commit to supporting the employment of 5,000 Indigenous rangers by 2025	Support	NRM and Ecosystem management for carbon sequestration pt 6 No specific number commitment but quantum equivalent
46. Guarantee the rights of charities to pursue their mission through non-partisan political advocacy	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
47. Introduce effective political donations reform	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
48. Create and resource a federal anti-corruption Regulator	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may
49. Ensure MPs and Senators do not move into lobbying roles within a reasonable time of leaving office	No Policy	While ICAN does not have a Party policy position on this issue individual candidates may

About this survey

Methodology

This document is the candidate's unedited responses to ACF'S 2019 *Climate Election independent and minor party survey*.

In the survey, the candidate responded to 49 key policy tests, grouped under four broad headings: ramping up renewables, phasing out coal, stopping Adani and protecting nature. Together, these are the priority policy commitments we believe are required to get Australia on the right path, addressing climate change and protecting the people, places and wildlife we love.

Respondents could give five possible responses for each test:

- Support
- Partial support
- No policy
- Oppose
- Comments

We sent this survey to selected minor parties and independents, with a deadline for response by close of business on 25 April 2019. It was beyond our resources to send this survey to the every minor party and independent candidate in every electorate and in both houses. We therefore excluded parties or candidates who:

- Focused on a single unrelated issue, and therefore were not likely to have policies relating to climate, energy or nature;
- Candidates or parties who we assessed to have an extremely low chance of winning a seat (acknowledging this is a subjective judgement).

Many of the independents and minor parties who received the survey did not respond.

See the survey responses from all of the candidates who responded at www.acf.org.au/scorecard_independent. The responses are the full statements from the candidates, without analysis by ACF.

In addition to this independent candidate survey, we have rigorously analysed the major parties' policies against the key tests in our 2018 National Agenda – see www.acf.org.au/scorecard.

About the Australian Conservation Foundation

We are Australia's national environment organisation – half a million people across the country who speak out for the air we breathe, the water we drink and the places and wildlife we love. We are proudly independent, nonpartisan and funded by donations from the community.

Authorised by Kelly O'Shanassy, Australian Conservation Foundation, 60 Leicester St Carlton.
