

SOLUTIONARY RAIL

Electrify US Railroads & Open Corridors for Clean Energy Transmission

When so many issues divide, Solutionary Rail unites Americans in common cause for a clean energy future.

Extensive benefits of an electrified railroad for freight and passengers:

- Greatly reduced number of freight trucks on our highways
- More options for travel for urban and rural dwellers
- Less air pollution in trackside and roadside communities
- Reduced energy use overall
- Potential for renewable wind and solar energy — and a zero-emissions transportation infrastructure
