

**BC Corrections
Violence Statistics (2011-2016)**

.....

The statistics are from the Integrated Corrections Operation Network (ICON). In 2008, the Corrections Branch began using a new automated system to capture violence statistics. This new information system, ICON, has business intelligence that records and reports violence statistics. The violence statistics are derived directly from incident reports completed electronically by the persons involved in the incident. The automated systematic reporting mechanism in use reduces the number of people involved in capturing the statistics and the opportunity for errors, and produces more accurate figures than the statistics that were manually calculated and reported in previous years.

Violent Incidents by Year:

Calendar Year	Incidents of Inmate Assaults on Staff	Incidents of Threats and Attempted Assaults Against Staff	Incidents of Inmate on Inmate Assaults	Incidents of Inmate-on-Inmate Threats, Fights and Attempted Assaults	Total Incidents
2016 (to June 30)	63	27	499	213	802
2015	99	94	782	440	1415
2014	71	81	535	291	978
2013	82	88	660	348	1178
2012	105	66	511	327	1009
2011	82	50	564	315	1011

Assaults are: Violent incidents that result in some degree of intentional physical contact or force such as throwing items, spitting, scratching, pushing or hitting.

Violent Incident Rate by Year (takes into account inmate population changes):

Calendar Year	Incidents of Inmate Assaults on Staff	Incidents of Threats and Attempted Assaults Against Staff	Incidents of Inmate on Inmate Assaults	Incidents of Inmate-on-Inmate Threats, Fights and Attempted Assaults	Total Incidents
2016	Not yet available	Not yet available	Not yet available	Not yet available	Not yet available
2015	0.35%	0.30%	2.52%	1.42%	4.59%
2014	0.28%	0.28%	1.89%	1.03%	3.48%
2013	0.30%	0.30%	2.22%	1.18%	4.00%
2012	0.37%	0.22%	1.70%	1.08%	3.37%
2011	0.26%	0.16%	1.76%	0.98%	3.16%

Method: The rate is calculated using the following steps. One, divide the total number of incidents each month by the average inmate count for that month. This produces a monthly incident rate. Two, average across the monthly incident rates to get a yearly average incident rate. Incident rates are calculated for complete years only.
