

*Sign the Petition: Make Massachusetts the First State to Put a Fair Price on Carbon!*

To: Governor Charlie Baker; Senate President Stanley Rosenberg; Speaker of the House Robert DeLeo;  
We, the undersigned, **to hold** polluters accountable for the damage that fossil fuels inflict on our air, our water, and the future stability of our climate; **to reduce** our reliance on imported dirty fuels such as oil and gas, and build a strong, independent economy that runs on clean, renewable sources of energy produced here in Massachusetts; **to protect** poor and vulnerable populations, both from suffering an unfair burden from fossil fuel pollution, and from bearing the cost of the transition to a just and stable future; **to honor** the legal commitment that Massachusetts made when we passed the Global Warming Solutions Act, to reduce our emissions in proportion to what the best scientific evidence indicates is necessary to avoid catastrophic global warming; **to write** the next chapter of bold Massachusetts policy leadership, and demonstrate to the country and to the world that pollution pricing can be good policy and good politics; and **to create** a safe and sustainable future for our children, our grandchildren, and all future generations, here in Massachusetts and around the world, call on the State of Massachusetts to put a price on global warming pollution.
