

JOIN 350 MASS!

We're building a powerful statewide social movement to confront the fossil fuel industry and demand real action on climate change.

Work alongside your friends and neighbors to:

- Promote wind and solar and fight against new fossil fuel projects
- Protect public health and ensure a livable climate for the next generation
- Create green jobs and move our economy away from oil, coal and gas

We have local chapters all over Massachusetts. Get details and find a chapter near you at www.350mass.org!
