Addressing Health Equity in the Fight for Healthy Moms Strong Babies
THE URGENCY OF PRETERM BIRTH IN THE U.S.
#1 CAUSE OF INFANT DEATH, CAUSE OF LONG-TERM HEALTH PROBLEMS

- 4 million babies born each year
- 380,000 are premature
- 1 in 10 are premature
- $25.1 billion excess annual health and societal costs in the U.S.
- $3.6 billion in CA annually
- $75k per birth annually
- Long term complications can include cerebral palsy, intellectual disabilities, chronic lung disease, blindness, and hearing loss

Causes of Infant Mortality 2013

- Preterm-related, 36.3%
- All other causes, 31.8%
- SIDS, 6.7%
- Birth defects, 20.4%
- Accidents, 4.9%
PRETERM BY RACE/ETHNICITY

Los Angeles county, 2015-2017 Average

Percent of live births

<table>
<thead>
<tr>
<th>Race/Native American</th>
<th>Percent (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hispanic</td>
<td>9.2</td>
</tr>
<tr>
<td>White</td>
<td>7.9</td>
</tr>
<tr>

<td>8.9</td>
</tr>
</tbody>
</table>

All race categories exclude Hispanics. Preterm is less than 37 weeks of pregnancy.

WHAT CAN WE DO TO ACHIEVE EQUITY AND IMPROVE THE HEALTH OF MOMS AND BABIES?

• Accelerate use of interventions
• Address social determinants
• Advance research
• Advocate for policies and legislation
• Partner for collective impact
Research breakthroughs:
A NEW BLOOD TEST FOR PREGNANT WOMEN

Researchers at the March of Dimes Prematurity Research Center at Stanford University developed a blood test using biomarkers (cell-free RNA) in maternal blood that accurately identified 75 to 80 percent of pregnant women who would deliver babies up to two months prematurely. This finding may help predict, and prevent, premature birth.

ADVOCACY

• Black Infant Health & CPEI
• AB 577: Postpartum Medicaid extension to 12-months for maternal mental health conditions
• SB 1383: Paid Family Leave
• SB 464: Dignity in Pregnancy and Childbirth
• MOMNIBUS Act
• CDC Hear Her Campaign to improve patient/provider communication
  • https://www.cdc.gov/hearher/

www.marchofdimes.org/advocacy/federal-advocacy.aspx
1. Optimize birth spacing/interconception care and pregnancy intentionality
2. Low-dose aspirin to prevent preeclampsia
3. Access to progesterone shots for women with a previous preterm birth
4. Group prenatal care
5. Eliminate non-medically indicated early elective deliveries (inductions and c-sections)
6. Smoking cessation
7. Vaginal progesterone and cerclage for short cervix
8. Reduce multiple births conceived through Assisted Reproductive Technology

INTERVENTIONS TO PREVENT PREMATURENESS and improve the health of moms and babies

FIND COMFORT AND SUPPORT ONLINE

Every mom and baby deserve the best possible start. But hundreds of thousands of families all across the country are impacted by preterm birth, NICU stay or loss. Find a supportive online environment that’s just right for you with trusted information and advice, helpful resources and caring people who want to connect.

MARCH OF DIMES COMMUNITY FACEBOOK GROUP

Families everywhere join the March of Dimes Community group on Facebook to find support, comfort and friendship. Get advice from a caring group on the challenges you're experiencing and also learn about all the resources available through March of Dimes and local initiatives. Join today at www.facebook.com/groups/marchofdimes

MARCH OF DIMES FACEBOOK MENTORSHIP

This mentorship program connects families from our community so they can offer advice and provide support for moms and babies. Members can share with others who've had similar experiences and can get reliable information and helpful resources from March of Dimes. For more information, go to www.facebook.com/groups/marchofdimes

NEWS MOMS NEED

We created this blog to empower moms to help their pregnancies and babies be as healthy and strong as possible. It covers such topics as becoming a mom, pregnancy, pregnancy complications and premature birth, among others. Visit www.newsfrommomsneed.org

UNspoken STORIES

#UnspokenStories is a community where stories of pregnancy, parenting and loss—from the ones that often go unshared—are told honestly. There’s strength in our collective voice! Hear the stories of others and learn how to host your own Unspoken Conversation by visiting unspokenstories.org

HEALTH ACTION SHEET

Signs and symptoms of preterm labor

- Even if you do everything right, you can still have preterm labor. Preterm labor is labor that happens too early, before 37 weeks of pregnancy.

- Babies born before 37 weeks of pregnancy are called preemies. Premature babies can have serious health problems at birth and even in life.

- Learning the signs of preterm labor can help keep your baby from being born too early.

What are the signs and symptoms of preterm labor?

- Change in your vaginal discharge (usually, there’s no blood or trace vaginal discharge means normal)
- Pressure on your pelvis or lower belly, like your baby is pushing down
- Constant low, dull backache
- Belly cramps with or without diarrhea
- Regular or frequent contractions that make your belly tighter like a fist. The contractions may or may not be painful.
- Your water breaks

If you have even one sign or symptom of preterm labor, call your health care provider right away.

When you see your provider, she may check your cervix to see if you’re in labor. The cervix is the opening to the uterus (vagina) that acts as the top of the fence (birth canal). If you’re in labor, your provider may give you medicine to help stop labor or to improve your baby’s health before birth.

If you have preterm labor, getting help is the best thing you can do.

Fill this out with your provider so you know when labor is preterm:

Example

Due date: August 29
Preterm labor: August 3

(If weeks or more before your due date)

Your pregnancy
Your due date
Preterm labor

# Make a birth plan.

While the COVID-19 pandemic continually changes, March of Dimes knows that every day babies are still being born. This document has been designed for you to assess the preferences you'd like based on the policies of your chosen place of birth. At the end you'll find a series of questions that you should ask your provider as you prepare for your baby's birth.

# When preparing for birth, call your facility to ask:

<table>
<thead>
<tr>
<th>Number</th>
<th>Question</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>6</td>
<td>What is the average time frame for post-partum discharge for mom and baby?</td>
<td></td>
</tr>
<tr>
<td>7</td>
<td>What is your facility’s policy around visitors after I have my baby?</td>
<td></td>
</tr>
<tr>
<td>8</td>
<td>What will happen if I test positive for COVID-19?</td>
<td></td>
</tr>
<tr>
<td>9</td>
<td>What will happen if my baby tests positive for COVID-19?</td>
<td></td>
</tr>
<tr>
<td>10</td>
<td>Are there any other facility-specific labor and delivery policies that I should be aware of?</td>
<td></td>
</tr>
</tbody>
</table>

# When you arrive, ask:

<table>
<thead>
<tr>
<th>Number</th>
<th>Question</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Have there been any changes in the facility’s labor and delivery policies?</td>
<td></td>
</tr>
<tr>
<td>2</td>
<td>While in labor, where am I permitted to move around?</td>
<td></td>
</tr>
<tr>
<td>3</td>
<td>What are the policies around eating and drinking during labor?</td>
<td></td>
</tr>
</tbody>
</table>
#PrematurityAwarenessMonth is more important than ever before as we face an urgent maternal and infant health crisis, with unacceptably high rates of preterm birth, maternal death and severe pregnancy complications.

March of Dimes is shining a spotlight on this maternal and infant health crisis. The U.S. preterm birth rate has increased for the fourth year in a row.

With your support, we can advance the understanding of premature birth, by working hand-in-hand with researchers, policymakers, community leaders and families.
