

## **Public Access to the Bordentown Township Emergency Global Alert System:**

### **Swift 911**

The Bordentown Township's Office of Emergency Management in conjunction with the Burlington County Office of Emergency Management is responsible to deliver emergency alerts throughout the Township as situations arise. Some are local in nature and site specific.

Previously we have installed the phone book published land lines into the system as of 2013. However, since that time, many residents and businesses have installed phone systems and cell phones that are not listed in the data base and therefore will not currently receive emergency messages through this Public Alert messaging system.

You can personally up-date the data base into the system "it remains non-public". Residents and businesses can register for Swift911 via web here:

<http://www.co.burlington.nj.us/210/Emergency-Notification-systems>

You then click on Swift911 Emergency Notification Services and register via the web.

Additionally, residents have the ability to OPT-IN via text: (99538 to SWIFT911)

If you are unsure that your phone is listed please register.
