

Health and the Built Environment: Are we ready for climate change?

What?

In parallel, rapid urbanisation and climate change are impacting upon the health of those who live in large cities. This is particularly the case during extreme heat events.

A research collaborative between the University of Sydney and the Chinese University of Hong Kong are currently investigating the impact of high density living and extreme heat on health in a changing climate.

We would like invite you to a workshop to hear the latest research in this area and also to hear your thoughts and comments on the changes to the urban environment in Greater Metropolitan Sydney, and whether it impacts upon your local community, workplace, lifestyle and/or health either positively or negatively.

Who?

This half day workshop is aimed at State and Local Government Planners, Aged Care Workers, Population Health Practitioners, NGOs, community workers, Environmental Health Officers, Academics and anyone interested in the environment and health.

When?

The workshop will be held on:

- Wednesday 21st August 2019
- 9.30am – 1pm

Where?

Medical Graduates Room
Anderson Stuart Building Room S235
University of Sydney.

The Anderson Stuart Building is on Eastern Avenue, opposite the New Law School Taste Café (a short walk from Redfern Station).
