

IMPACT

of the Health Care Climate Challenge

Climate challenge participants are committed to reducing their aggregate greenhouse gas emissions by more than

34 MILLION METRIC TONS OF CO₂e per year

This is equivalent to

A year of carbon emissions from **9 COAL FIRED POWER PLANTS**

Emissions reduction from installing and running **7 THOUSAND WIND TURBINES** for a year

4 MILLION (U.S.) homes' energy use for one year

SAVING \$3.2 (USD) BILLION in health costs related to air pollution (*)

Climate Challenge participants also report saving

\$394 (USD) MILLION

through energy efficiency and renewable energy generation.

2019 Climate Champion Award Winners
