ALLIANCE

Strategic Plan 2020–2023

Our strategy for a healthy future

Mission

To build a powerful health sector movement for climate action and sustainable healthcare.

Vision

The health sector plays a leading role in restoring a safe climate, and an ecologically sustainable, just and healthy world.

Statement of Concern

Climate change is the greatest threat to health we face

Theory of Change

If the health sector leads on climate advocacy and solutions, decision-makers and the public will act, because the community cares about health and trusts health voices.

Recognition and Commitment

We recognise Aboriginal and Torres Strait Islander People as the traditional custodians of the land on which we live and work and acknowledge that sovereignty of the land we call Australia has never been ceded. We commit to listening to and learning from Aboriginal and Torres Strait Islander people and organisations about how we can better reflect Indigenous ways of being and knowing in our work.

Our Values

Integrity

We are honest in our actions, and in our statements; we respect others, and keep our commitments

Evidence

Our work is based on scientific evidence, and we utilise and encourage research to guide our work

Inclusiveness

We aim to engage a wide range of stakeholders in our work to ensure we are informed by a diversity of views and opinions

Commitment

We are unwavering in our commitment to achieve our goals

Collaboration

we recognise that our success depends on collaborating with others

Passion

We are determined to ensure all possible actions are taken to protect people's health from climate change

Fairness

We abide by principles of social and environmental justice
