Cairns leaders unite to support port development

'DON'T SINK OUR PORT'

"This is one of the biggest issues to have confronted the city in my lifetime"

Cairns Mayor Bob Manning

Please ask your friends and family to sign.

- We love the reef. There is a way to safe guard it and have a modern port.
- What may happen to Cairns in the future if widening and deepening is banned?
- Growth in ALL industries will continue to be suffocated.
- World-leading studies show Cairns and Mourilyan harbour dredging does NOT harm the Reef.
- Applying best practice science and technology is the best protection for the reef.
- Placing new spoil offshore has been banned, although it can be viably placed safely on land.
- Despite claims by environmentalists, East Trinity was never pristine wetlands.
- Larger cruise, fuel, cargo and navy ships will pump \$5 billion into local business over 25 years.
- Fuel and cargo vessels are currently coming into the port half full increasing costs.
- One third of the fuel coming in is used at our international airport which is growing.
- HMAS Cairns is Australia's third largest Navy base and the marine industry employs over 4000.
