

An assessment of excessive tort costs in the Los Angeles-Long Beach-Anaheim MSA and California and potential economic benefits of reform

A flawed civil justice system which generates exorbitant levels of damages or numbers of awards and which is unpredictable in its outcomes may result in negative impacts through the misallocation of society's scarce economic and human resources. Tort reform can lead to substantial economic benefits, and states which have implemented reforms have seen improved judicial efficiency and measurable advancement in economic performance.

All major industry groups are negatively affected, with the retail trade, business services, health services, and other services industries typically experiencing the greatest losses.

The Perryman Group estimates that excessive tort litigation in the **State of California** results in:

- \$11.6 billion** in direct costs annually
- \$18.5 billion** in gross product annually
- \$961.0 million** in State revenues annually
- \$804.7 million** in local government revenues annually
- 197,776 jobs**

Excessive tort litigation in the **Los Angeles-Long Beach-Anaheim MSA** results in:

-\$5.491 billion
in direct costs annually

-\$9.736 billion
in gross product annually

-\$5.734 billion
in personal income annually

-93,622 jobs

Excess costs result in a **"tort tax"** of
-\$726.93 per person

Notes:

The economic effects of excessive tort costs take into consideration dynamic multiplier effects. The "tort tax" is defined as the per capita loss of gross product in the area. The Perryman Group compared California's tort costs to those in the benchmark state used in this study (Ohio), which has enacted notable reforms and exhibits an average level of tort costs, to quantify the amount of excess costs as of 2018. Costs were allocated to the **Los Angeles-Long Beach-Anaheim** Metropolitan Statistical Area (**Los Angeles** and **Orange** counties) based on relative legal costs in the area and economic and demographic patterns. Tort reform can reduce or eliminate these costs. Thus, these results may also be viewed as a measure of the benefits of reasonable reform measures.
