Petition: No to the Financing of Abortion in the Third World

To the House of Commons:

March 8, 2017, International Women's Day, the Government of Canada announced, by the Prime Minister Justin Trudeau, to allot $650 million over 3 years for women's "reproductive health" In the Third World. Any doubt about the meaning of this euphemism - "reproductive health" - was dispelled when Mr. Justin Trudeau stated that being against abortion means being against the future of women.

Contrary to what the Prime Minister says, being against abortion means *being for* the future of millions children who perish yearly in their mother's womb, *being for* women who often experience serious and lasting complications after an abortion, *being for* the family, marriage and healthy sexuality, *being for* God who is the author of all human life.

We, the undersigned, ask the House of Commons, gathered in Parliament to immediately reverse this decision to fund abortion in the Third World.
