Subject: Naming the districts - General comment, response requested

Dear CRC

Does the law providing for the redistricting process provide an opportunity to give names to the districts, like Canada and the U.K. do?

I think if the law does not provide for it, it should be amended to do so, to help voters better identify with their districts.

Could this be done by legislation, or would it have to occur by initiative?

Perhaps each district could have a name and a number.

Thanks
