Hello my name is Jacque Casillas, I’m a community leader and healthcare advocate in Corona, where I was born and have lived for 35 years.

My community is the gateway to Riverside County and we make up the west side of the county. Out here, we live and die by traffic along the I-15 and SR-91 freeways. We all know the alternative routes to take when traffic is a mess – Cajalco road, Hamner Ave, Van Buren Blvd., and Magnolia Ave. I cannot stress enough how much these transport corridors connect us all. They connect our jobs and our school and I ask you to please draw the lines for this congressional district accordingly.

The last citizen commission did a good job of ghtening up the district, but we think you can do even better. For instance, they kept the Corona, Norco, Eastvale cities together which is great because we share a k-12 school district. But they split up Temecula and gave our congressional district odd outlier branches on the east side instead of bringing in the cities of Perris, Mead Valley, and Lake Mathews that all lie along Cajalco.

Ultimately, I humbly ask you to respect our community by tweaking the congressional map to incorporate the communities along Cajalco and the remainder of the city of Temecula into CD – 42 and omit the outlier eastern branches of the district as they are not along these vital transport corridors. Please find a version of what this congressional district should look like.

Thank you very much for your considera on and your dedica on to crea ng fair and logical maps.

Sincerely,

Jacque Casillas
