I did not get the information on citizen input until today, 8/30. I would definitely like to see San Joaquin County in its own district for our House Representative to Congress. As it is now, our district includes our county and part of the Bay Area, which has totally different interests than our county. Our representative generally votes according to the wishes of the citizens of the Bay Area. We are a highly agricultural area and the Bay Area is not, plus they are very urban. Please redistrict so that we can be in our own district, or at least with a county similar to ours.

In the future, it would be most helpful to all citizens to disseminate more information on how we can participate in this process.

Thank you,
Marilyn Shore
