Hello
Thank you for providing the opportunity to submit my input about the redistricting process.

It's my understanding that the electoral process serves as a tool to manipulate and undermine the democratic process.

I don't believe any district boundaries can fairly and accurately group voters towards being better represented by a Republican or Democratic representative because individual perspectives and values can't be grouped accurately and fairly. Such boundaries also encourage divisiveness and discrimination.

I look forward to creating a truly fair and democratic system that abolishes the manipulation by the electoral system.

Please keep me informed if efforts are made to abolish redistricting/the electoral system.

Until then, I appreciate that I/the people can participate and verify that their community is accurately represented.

Thank you

Nadine Hug Martins
