

Caller 8779:

Good evening, these Fremont mayors, I want to thank you for the opportunity to share about the redistricting for the congressional district. I want to share that we shared a letter and in particular our city shares a lot of our workforce and is considered as part of the commonly with Silicon Valley, which is why we would like to still be associated with Cupertino and Santa Clara. It, also, helps us to align with the south bay as we have many fractures and technology companies and a similar interest but, also, very importantly it's, also, important that we have a lot of both the southeast Asian Indian and Chinese populations that are tied and a lot of our cultural centers that are aligned and we have the community center that is based in looptops as well as the economic cultural office and there are a lot of activities that are in synergy so I just wanted to share in support of a letter that we expressed that Fremont would like to continue to be part of the perceived silicon valley and to align our congressional district in such a way that keeps us in tied with Cupertino and Santa Clara.
