Subject: We Need (and should have) a New District!

Message Body:

Dear Commission Members:

I am one of many new Placer County residents from the Bay Area. My attraction to this area was the affordable housing, elevated quality of life, and a sense of community that is currently challenged in the Bay Area. Gentrification is polarizing those communities because legacy residents and new entrants are without common values or culture. The chill of Silicon Valley is seeping into what was once warm, connected communities as new residents frequently repel cultural history and connection.

So, we come to Placer, El Dorado, Nevada Counties, and the Folsom Lake area for the opportunities to live a better life in a community of similar values. We should be officially connected in a new district.

The sense of community we enjoy from Roseville to Folsom Lake, Nevada County, and Auburn is a manifestation of our common characteristics and interests.

Our communities are linked in lifestyle. Our shopping, dining, biking, wineries, and other recreational activities are seamless. Our neighborhoods attract new residents with an appreciation for history and culture that stand as a backdrop to convenient and varied housing opportunities. It's not about turning this area into the Bay Area, it's about appreciating what this area has to offer and being connected to those with like minds, values, and spirits.

It is important that we are not scattered throughout a huge area that is not representative of our common interests. We are not like Amador or Tuolumne Counties. We should have a new district that is truly reflective of our community ties.
