NOTE: for some reason the map links for congress and state senate are not working (assembly is working). Please copy them and paste into www.districtr.org or Google Chrome and it will take you to the maps.

I have been asked to suggest proposed Congressional, State Senate and State Assembly boundaries for submission to the CRC prior to October 11, 2021. I could not find the tool on the CRC website to draft these boundaries and also could not figure out on this CRC page how to submit the maps. I am hoping that someone receiving this message will figure out how to submit the maps and share that method with everyone else. I drafted the maps in a program that Napa County, Napa Valley College (NVC), the Napa County Board of Education (NCBOE) and the City of Napa will be using to draft local supervisor districts, NVC and NCBOE trustee areas and city council districts, i.e. www.districtr.org

I think these proposed districts meet the Board of Supervisor's goals of 1) keeping Napa County whole within each district and 2) associate Napa County with other grape growing-wine producing, agricultural and tourism counties. If everyone can agree on these maps for submission, and if these maps drawn in the "districtr" application can be submitted to the Citizens Redistricting Commission as is, then we should try to get as many individuals and groups as possible such as the Community Leaders Coalition, the Farm Bureau, the Vintners, the Grapegrowers, the chambers of commerce of all

the municipalities to submit these maps to the CRC before October 11.

Ideal congressional district https://districtr.org/plan/56183 This district is 84 people short of ideal. I am not sure if the 760,351 ideal population in districtr is based on the final census data minus Napa State Hospital patients and plus state prison population allocated out to their communities. The ideal congressional district consists of Napa, Sonoma, Mendocino and a portion of Lake counties.

Ideal State Senate District https://districtr.org/plan/56184 This district is 401 people over the ideal population but the ideal of 988, 456 may not be final. The ideal Senate district consists of Napa, Sonoma, Lake, Mendocino and a large portion of Yolo County.

Ideal State Assembly District https://districtr.org/plan/56185 This district is 81 people under the ideal of 494,228 but that ideal figure may be subject to change per above comments. The ideal Assembly district consists of Napa, Lake, Yolo and a strip of eastern Sonoma County running from San Pablo Bay to Cloverdale.

Thank you for submitting these maps (or any version you believe meets the goals above) to the CRC prior to October 11, 2021. I am submitting the maps as an individual as soon as someone shows me how to do so,

JOHN TUTEUR
